Dental Hygiene Schools

University of New England, Westbrook College Campus, and Portland: School of Dental Hygiene – provides preventive services, Sept. to April. (221-4900)

Dental Health Programs

University of Maine, University College, Bangor: Dental Health Programs – provides preventive services, Sept. to April. (262-7872)

Preventive Dental Hygiene programs offer a range of preventive services provided by registered dental hygienists practicing in Public Health Supervision status. They provide services via contracts & other arrangements with schools, Head Start and WIC agencies, other community agencies such as Boys & Girls Clubs, and others. There are a number of these programs in Maine, some operate locally, and others have a regional or state wide focus. Independent Practice Dental Hygienist also offers preventive dental hygiene services. The Maine CDC Oral Health Program tries to maintain a current list of Dental Hygiene Program.

Other Preventive Services Programs

- Tooth Fairies, Inc. (754-8487) primarily western Maine (mobile)
- Maine Dental Health Outreach, Inc. (Tooth Angels) (377-7003) based in Winthrop, works with surrounding school systems
- Saving Smiles, Inc. (445-2852) central Maine and Waldo County (mobile)

Washington County Children’s Program, Machias: (255-3426) operates the “Tooth Ferry”, a mobile dental unit that travels to the various schools and other agencies that the WCCP’s dental program works with, providing screenings, sealants, and dental health education.

Waterville Pediatrics (873-5437): Employs a dental hygienist part-time within the practice who provides preventive dental services to eligible children (those who do not have a family dentist).

Aroostook County Action Program, Presque Isle: (768-3026) employs a full-time dental hygienist in its WIC program who provides preventive dental

services to eligible children (those who do not have a family dentist).

ME DHHS, Center for Disease Control, Oral Health Program (287-2361): School Oral Health Program provides grants for classroom-based preventive oral health education and weekly fluoride mouthrinse in grades K-6 in eligible elementary schools, and sealants to 2nd graders. Eligibility is based on community-based criteria related to access to fluoridated water, MaineCare enrollment, poverty rate, and student eligibility for free and reduced lunch.

Definitions:

A **dental clinic** is a dental program with a fixed site, permanent equipment (rather than portable), employed staff and regular hours, where people may receive a full range of preventive and restorative dental care. Specialty services may or may not be available.

Mobile programs may either use a vehicle, such as a specially outfitted truck or coach, in which dental equipment has been installed, or may be mobile in the sense that they bring portable equipment to the various locations where they provide services.

Volunteer or voucher programs depend largely on health professionals who donate their time to provide dental services. Such programs in Maine are individually designed and no two are alike. A voucher program coordinates the referral to services of qualified individuals and may or may not provide some services prior to referral.
